

### Project Concept Form

|                                       |  |
|---------------------------------------|--|
| <b>Project title:</b>                 | Business Center in Telenești city  |
| <b>Location:</b>                      | Center Region; Telenești rayon, Telenești city and localities of rayon   |
| <b>Applicant:</b>                     | Telenești rayon council  |
| <b>Partners:</b>                      | ODIM   |
| <b>Overall objective:</b>             | Contributing to regional economic development by creating an efficient environment to initiate and sustain business by opening the Business Centre in the Telenesti city.  |
| <b>Description of the project:</b>    | Destruction of industrial economic activity and especially at the macroeconomic level that took place in the last decade, accompanied by decreases in the number of employees in the productive economy has not been properly followed by an increase in private sector. Therefore most small towns have been affected by migration of able-bodied young people and those with university. Now over a decade of declining economic activity, people migrated from small towns no longer have any incentive to return and invest in their native city because of lack of opportunities to have an efficient support for business. This calls attention to the need to improve the business environment along with creating the basic tools to support SMEs (consulting, information and support). SME development should contribute to overcoming social and economic difficulties in the region, especially in small towns. Opening Business Center will contribute to the economic recovery of the region and the Centre Region. Business Centers is one of the few solutions to companies vulnerable as available to entrepreneurs a series of strategic and logistical services to develop. |
| <b>The proposed activities:</b>       | <ul style="list-style-type: none"> <li>• Project management, coordination and communication activities.
